- › NCARB Certification
- › Society for College & University Planning

Paul Zajfen has practiced architecture for over 45 years in the US, England and Canada, and has designed exceptional projects in support of clients’ missions to benefit society through educational, civic and community goals. Paul’s work raises expectations for architecture to improve the way people work and learn. His projects include university research and teaching facilities, schools of medicine and health, university housing, city and college libraries, justice facilities, civic and performing arts centers, and urban design. Paul earned Bachelor of Architecture and Bachelor of Science degrees at McGill University in Montreal, and has been with CO Architects since 1998.
